Products (http://www.kmpelectronics.eu/en-us/products.aspx) ▸ ProDino WiFi-ESP (http://www.kmpelectronics.eu/en-us/products/prodinowifi-esp.aspx) ▸ **ProDino WiFi-ESP flash firmware** (http://www.kmpelectronics.eu/en-us/products/prodinowifi-esp/prodinowifi-espflashfirmware.aspx)

How to flash firmware on the device

1. Get Arduino programmer and debugger like this:

Attention! The programmer must be set to 3.3V! Please check. The device will be damage if it set on 5.0V.

2. Plug the programmer in J1 connector.

Attention! The GND on the programmer must be in right position.

3. Power the device.

4. Link programmer and computer with USB cable.

5. In Arduino IDE set your Programmer port from menu Tools/Port

6. Click Verify

7. Click Upload. Press and hold a button Flash (B2) on the board.

8. After start flash, you release the button.
